Tour of automated peritoneal dialysis APD machines

In 1970, the APD machine (also known as a cycler) was released to a select few CKD patients who could perform peritoneal dialysis (PD) using a machine at home. Peritoneal dialysis showed high demand in the 1980s and the APD machine allowed many PD patients to free themselves from performing manual PD exchanges during the day.

Portable Hemodialysis Machine | NxStage System One

The NxStage System One is the first and only truly portable hemodialysis system cleared for home use in the United States, including solo hemodialysis during waking hours, and nocturnal hemodialysis, while both the patient and care partner sleep. It was specifically designed for patients to use in their homes,...
