Our Mission: The Department of Pediatrics at the Yale School of Medicine is committed to transforming the health and well-being of children and adolescents by:

Patient Care Phase | Medical Student Program | Department ...

The core pediatric clerkship is designed to provide a comprehensive overview of the approach to the care of children and their families. In addition, you will explore the range of reasons children seek medical care, from well child visits to acute medical problems in both the inpatient and outpatient setting and the ongoing management of chronic illnesses.

Pediatrics Residency

Pediatrics Residency . The Pediatrics Residency training program at T.C. Thompson Children's Hospital provides the highest quality education with state-of-the-art facilities.

KU Pediatrics

Patient Care: We have outstanding medical services and programs for children and teens, and once they have grown into young adults, we help them transition from pediatric to adult medical care. When your child is sick, you can get a timely appointment at a location convenient for you -- multiple offices in the KC area and a new outpatient clinic at the KU Medical Center campus.

Aquifer Pediatrics (formerly CLIPP) | Case

With realistic case scenarios that demonstrate best practices, our course builds a bridge from content to practice for our students. Aquifer Pediatrics' interactive virtual patient cases are based on the COMSEP curriculum, recently revised for renewed and improved attention to clinical reasoning process.

Neonatal and Infantile Common Skin Lesions | Pediatrics ...

Erythema toxicum neonatorum. Occurs in 30-70% of full-term infants, making it the most common pustular

eruption in newborns. Etiology is unknown.
