Demo of the Boss PS3. Clean tone is Prairiewood Les Paul into a Matchless HC30, 65 Amps birch cab with a Blue and G12H-30. The playing gets sucky at the end....

BOSS PS3 or PS5?

The PS-3 is quirky.... good for digital delay, modulation, basic pitch shifting and weird noises. The PS-5 is a bit more of a players pedal, IMO. It's more advanced as far as pitch shifting and harmonizing goes and while it has some features you could use in atypical ways, it isn't quite the quirky thing that the PS-3 is.
